Professional Summary

Software Engineer experienced in building AI/LLM applications, agentic systems, real-time voice assistants, full-stack applications, and enterprise automation. Skilled in Python, FastAPI, React, React Native, TypeScript, Firebase, Gemini, Groq, Deepgram, WebSockets, and Docker, with a focus on scalable backend services and intelligent automation.

Technical Skills

Languages: Python, C/C++, JavaScript, TypeScript, SQL, HTML, CSS

AI/LLMs: Google Gemini API, Gemini 2.5 Flash, Groq LLM, Agentic AI, Prompt Engineering, Streaming LLMs

Frameworks & Backend: FastAPI, React, React Native, Expo, Streamlit, WebSockets, REST APIs, Async

Programming, Multithreading

Cloud, Database & APIs: Firebase, Cloud Firestore, Vercel Serverless Functions, Deepgram STT/TTS, UPI Intent API, Web Speech API

Libraries & Tools: React Navigation, Tailwind CSS, Pandas, NumPy, Plotly, Web Audio API, Docker, Git, GitHub, Linux, Render, Vercel

Experience

Associate Software Engineer, Accenture

Aug 2026 – Present

- Developing AI-driven automation for enterprise IT operations, streamlining ServiceNow workflows and reducing repetitive manual ticket-handling effort.
- Integrating AI/ML capabilities with enterprise IT service-management systems to improve ticket triage, workflow routing, and operational productivity.
- Building scalable software components for enterprise automation with emphasis on reliability, performance, and production readiness.

AI Intern, HumanizeIQ

June 2026 – July 2026

- Integrated Gemini-powered AI features into Secure Chat for real-time conversation, brainstorming, diagramming, and creative assistant workflows.
- Engineered prompt strategies for summarization and intent understanding, improving response relevance across AI-assisted chat workflows.
- Implemented permission-aware backend controls to protect sensitive user data in secure enterprise chat contexts.

Software Developer Intern, Accenture

Dec 2025 – May 2026

- Developed AI-driven automation for enterprise IT operations, streamlining ServiceNow workflows and reducing repetitive manual ticket-handling effort.
- Integrated AI/ML logic with IT service-management systems to improve triage, workflow routing, and operational productivity.
- Delivered intelligent workflow automation components emphasizing reliability, maintainability, and scalable deployment.

Projects

Hyperlocal Commerce & Store Management Platform

[Live Demo] [GitHub]

- Built a full-stack hyperlocal commerce platform with a React Native customer app and React-based web POS supporting product browsing, cart management, UPI checkout, and order tracking.
- Implemented real-time order synchronization with Firebase Cloud Firestore, keeping customer and store-counter interfaces synchronized across devices.
- Integrated UPI Intent payments, OTP authentication, Vercel Serverless Functions, and Hindi/English Web Speech API announcements for new orders.

AuraSpeak – Real-Time AI Voice Assistant

[Live] [GitHub]

- Built a real-time AI voice assistant with sub-500ms end-to-end response latency using Python, FastAPI, WebSockets, Deepgram STT/TTS, and Groq LLM streaming.
- Engineered a concurrent speech pipeline for transcription, LLM inference, and TTS playback with multithreading and interruption handling.
- Developed a browser voice interface using Web Audio API, AudioWorklet, and Canvas; containerized with Docker and deployed on Render.

Autonomous Infrastructure Agent – Self-Healing IT Operations

[Live] [GitHub]

- Built an AI-powered self-healing infrastructure agent using Python, Streamlit, Gemini 2.5 Flash, and psutil for anomaly detection and AI-driven root-cause analysis.
- Designed a Human-in-the-Loop remediation engine with manual-approval and autonomous modes for controlled AI-driven process termination.
- Implemented real-time telemetry, Plotly visualizations, and append-only audit logging; deployed on Streamlit Community Cloud with credential-free Demo Mode.

Education

Rajiv Gandhi Institute of Petroleum Technology

2022 – 2026

B.Tech. in Computer Science and Engineering

CPI: 7.69

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Deep Learning, DBMS, Operating Systems, Computer Networks

Dr. I.S.N.R.K.P.L.D. Kisan College, Sitamarhi – Intermediate: 80.8%

2019 – 2021

Simultala Awasiya Vidyalaya – Matriculation: 94.2%, Bihar Board State Rank 13

2018 – 2019

Achievements

- IIT Mandi Hackathon, Winner
- IIT Bombay Hackathon, Grand Finalist
- JEE Advanced Top 2%
- Bihar Board State Rank 13 in Matric Examination
- NTSE Stage 1 Qualified
